Psychologists are uniquely qualified to do brief evaluations but often do not take advantage of this skill. Self-report inventories and rating scales can be utilized to routinely assess patient progress. This presentation will show how affordable, easily administered instruments can substantially enhance treatment response. Certain on-line outcome measures can be given in each session and provide immediate feedback, helping to warn of negative outcomes.

Sponsored by Washtenaw Psychology Society (WPS)

1 hour of free CE credit available for MPA members.

MPA is approved by American Psychology Association to sponsor continuing education for psychologists. MPA maintains responsibility for this program and its content
